

- * Service worker generation
 - * Declarative JSON-based setting instead of javascript
 - * Push notifications / Lifecycle events
- (wrap API in a service that you can listen to Observables)

```
// .angular-cli.json
{
  ...
  "apps": [
    {
      ...
      "serviceWorker": "true"
    }
  ]
}
```

```
$ ng set apps.0.serviceWorker=true
```
