

A service worker is a **script** that runs
in the **background** of your browser
when you view a webpage.

It's opening the door to features
that don't need a web page or user interaction.

Service Workers - WD

Method that enables applications to take advantage of persistent background processing, including hooks to enable bootstrapping of web applications while offline.

Global	65.29%	+ 8.16%	= 73.45%
Germany	58.36%	+ 0.43%	= 58.79%
Norway	52.51%	+ 0.43%	= 52.94%

Service Workers

A method for browsers to run JavaScript in the background to handle network requests and manage cached responses. Service Workers offers a replacement for Application Cache.

Service Worker

ServiceWorkers (formerly Navigation Controllers) are a new system that provides event-driven scripts that run independent of web pages. They are similar to SharedWorkers except that their lifetime is different and they have access to domain-wide events such as network fetches.
